Value: \$450

Price: **\$396.00**

Dear Educator,

Children want to know! They want to learn about their bodies and how to be strong and healthy. They want to learn how to be safe and live a healthy lifestyle. We know this learning begins early and continues throughout life. **Incorporating health education into the classroom will have a positive impact on both home and school!**

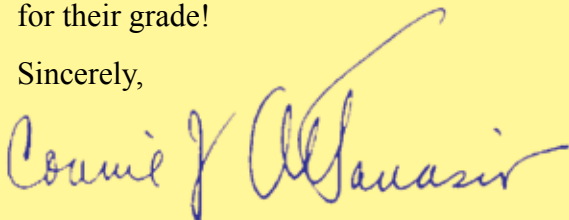

The Attanasio Health, Safety and Nutrition libraries serve as a framework for classroom instruction and discussion. Following the guidelines of the National Health Education Standards*, these libraries provide students with books that will expand their knowledge base, offering a coherent vision of what it means to be “health literate.” (*NIH; American Cancer Society, 2007)

Our students’ education must keep pace with a rapidly changing world. Often they have difficulties **managing the strong emotions of adolescence, changing patterns of family living, balancing the potentially life-threatening lure of drugs and alcohol with peer pressure, and developing a healthy relationship with food.** The books in these libraries offer a **factual, non-threatening way** to explore and learn about these issues and more, including:

- **Nutrition**
- **Family life**
- **The dangers of alcohol, tobacco, and drugs**
- **Safety, first aid, and survival**
- **Community health**
- **Environmental health**
- **Diseases and disorders**
- **Consumer health**
- **Emotional health**
- **Healthful life styles**

Prepare your students to live a healthy lifestyle with books that are developmentally appropriate for their grade!

Sincerely,

Connie J. Attanasio
President, CEO

P. S. Attanasio & Associates does not backorder books. We reserve the right to substitute any out-of-print or out-of-stock titles with a similar one of equal or greater value. Libraries contain both hardcover and soft cover books to enhance your classroom collections.
