Learn-Abouts Leveled Social Studies and Science Kits

- Develop vocabulary and comprehension skills
- Foster independent reading

Learn-Abouts Kits are divided into two categories, Science and Social Studies, which explicitly teach vocabulary and comprehension skills. There are four Science strands: Earth/Space, Energy, Life Science, and Matter. There are also four Social Studies strands: History/Culture, Geography, Economics/Technology and Government/Authority. Look for these great features in each kit:

- Eight different titles, 6 copies of each guided reading levels, A/B, C, D, and E in either Social Studies or Science.
- **Teacher Notes** with explicit comprehension and vocabulary sequences, oral language and writing activities.
- **Blackline Masters** for each title with independent follow-up work that can be photocopied for students.
- **Strong picture support** for all levels including a **picture dictionary to introduce content vocabulary.**
- An activity page at the end of each book that reinforces and extends the content.

Add these **leveled content area books** with incredibly beautiful photographs to your classroom today!
